

Jet Diffuser

JD

Specifications

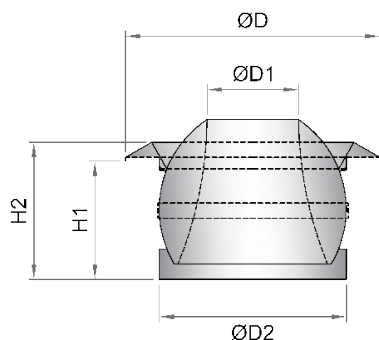

- Item code: JD
- The nozzle and the decorative ring are manufactured in aluminium
- The connection part is made of aluminum
- Hidden fixing
- Available sizes in mm: 100, 125, 160, 200, 250, 315

Description

The Jet Diffuser is ideal for large, high spaces such as theaters, cinemas, industrial halls and shopping malls. This diffuser offers low sound pressure and high airflow capacity, providing a wide range of air distribution. Suitable for both horizontal and vertical air supply. The spherical nozzle can be adjusted every 30° in different directions without affecting air resistance or noise level.

Other RAL colours for the Jet Diffuser are also available on request.
